

TIPS FOR KIDS

Turn it Off

Turn off the lights, TV and devices when not using them. Use power strips.

Keep it Cool

Take what you need from the refrigerator, then close it.

Reduce Laundry

Laundry full loads, not just a few outfits. Dry clothes on an outdoor line or indoor rack.

Warm Yourself First

Put on a sweater, hoodie or long underwear before turning up the heat.

Don't Waste Water

Turn off the faucet when brushing your teeth or washing dishes.

Ride Your Bike or Walk

Don't ask adults to drive you if you can walk or ride your bicycle.

Have Fun Outside

Play outdoors instead of video games. You'll make friends and stay healthy.

Use Reusable Batteries

Use batteries you can recharge and use again.

Plant a Tree or Garden

Trees create shade and absorb air pollution. Food you grew tastes best.

Set Good Examples

Tell others about your climate actions.

Don't Litter

Recycle it if you can, or throw it away.

Reuse Stuff

Pack your lunch in reusable containers to make less trash.

Drink Lots of Water

Drink from a reusable bottle, not throw-aways. Drink extra on hot days.

Don't Throw It Away

Don't buy stuff you don't need or can't recycle. Give away toys and clothes you no longer need.
