

## KU's Proposed COMMERCIAL Rates Increases

### ELECTRIC

	current	proposed	increase (\$)	increase %	avg mo. use	
<b>single-phase</b>						
meter fee/day	\$1.04	\$1.35	\$0.31	30%		\$113.15
usage/kWh	\$0.11225	\$0.12469	\$0.01244	11%	1,689	\$252.13
<b>Total Increase/Year</b>						<b>\$365.28</b>
<b>three-phase</b>						
meter fee/day	\$1.66000	\$2.15000	\$0.49000	30%		\$178.85
usage/kWh	\$0.11225	\$0.12469	\$0.01244	11%	?	?
<b>Total Increase/Year</b>						?

**NOTE:** LG&E published the average consumption figures for commercial customers using lower gas volumes and single-phase power, but not for larger users. **Consumption is highly variable.** To calculate the impact of the proposed rates on your business, multiply your actual gas **usage** costs by 10% and your actual electrical **usage** costs by 17%.
